

## Mayor Bryan Dexter Tadena Engages with Community-Based Monitoring System (CBMS) for Local Empowerment

Participants of the Community-Based Monitoring System (CBMS) led by Mayor Bryan Dexter V. Tadena

In a proactive move towards bolstering community development and ensuring effective governance, Mayor Bryan Dexter Tadena of Santo Domingo recently participated in the Community-Based Monitoring System (CBMS) organized by the Philippine Statistics Authority (PSA).

The CBMS is a robust household enumeration and geo-tagging service designed to comprehensively understand the needs and dynamics of the local community. Mayor Tadena's active involvement in this initiative underscores his commitment to evidence-based decision-making and targeted resource allocation.

The CBMS employs a meticulous process of collecting and analyzing data at the household level, providing a comprehensive snapshot of the community's socio-economic landscape. This information becomes invaluable in crafting policies and programs that directly address the unique challenges and aspirations of Santo Domingo's residents.

Mayor Tadena emphasized the importance of the CBMS in shaping a more inclusive and responsive local governance. He stated, "By actively engaging with the CBMS, we are not only gathering data; we are investing in the empowerment of our community. Understanding the specific needs of each household enables us to tailor our efforts, ensuring that no one is left behind."

The geo-tagging component of the CBMS allows for the mapping of resources, infrastructure, and vulnerable areas within Santo Domingo. This spatial data becomes instrumental in urban planning, disaster preparedness, and overall community development.

The participation of Mayor Tadena in the CBMS reflects Santo Domingo's commitment to embracing modern technologies and methodologies for efficient governance. It also underscores the LGU's dedication to fostering a transparent and accountable administration.

The event drew the participation of various community leaders, stakeholders, and local residents. Their engagement in the CBMS process highlights the collaborative effort between the local government and the community in building a stronger and more resilient Santo Domingo.

As Mayor Bryan Dexter Tadena continues to champion initiatives like CBMS, Santo Domingo stands poised to witness tangible improvements in the quality of life for its residents. The commitment to data-driven governance ensures that policies and programs are not only well-intentioned but also precisely targeted to meet the evolving needs of the community.
